Project Proposal: Website Development for Candice Cakes

1. Organisation Overview

- Name: Candice-Cakes
- Candice-Cakes is a small ,home-based bakery in Gugulethu, Cape Town that focuses on custom cakes. The business provides a more personal and high-quality alternative to the mass-produced cakes normally found in large retail stores.

Mission

To create hand-made cakes that make special occasions more memorable whilst maintaining an authentic, home-baked quality.

Vision

The long-term vision is to become a well known neighborhood destination for local families who want reliable, affordable and beautiful cakes for their celebrations.

Target Audience

- People living in Cape Town specifically in Gugulethu , seeking unique themes and a personal touch that commercial bakeries often lack.
- Budget-Conscious shoppers
- Mobile-users

2. Website goals and objectives

Goals:

1. To build a permanent digital storefront that keeps the business visible twenty-four hours.
2. Create a professional gallery that does not disappear.
3. To reduce the amount of time the baker spends answering basic questions about prices and flavors
4. To make the ordering process more organized so that important details like the dates and allergies are not lost in chat messages.

Objectives:

1. To provide a clear HTML table that allows customers to see all affordable pricing options immediately.
2. To use a functional Enquiry Form that captures all necessary information easily.
3. To ensure that the website is fully responsive so that customers can easily place orders from their mobile phones.

3. Current Website Analysis

Strengths

- Loyal customer base
- Good personal communication through WhatsApp Business

Weaknesses

- No permanent home for business information.
- Photos of cakes disappear after twenty-four hours.
- Zero visibility for people searching on Google.

Areas for improvement

- Creation of a permanent gallery
- Creation of a clear menu to stop the owner from repeating the same information to every customer.

4. Proposed Website Features and Functionality

Homepage:

A simple landing page with a nice photo of a cake and a clear “Order” button.

- About Us:

The story of the bakery to make the business feel more personal.

- Menu and Prices:

A clear HTML Table showing flavors, sizes, and affordable prices.

- Gallery:

A permanent place for photos of past cakes so customers can see the quality of the work.

- Enquiry form

A structured form to collect order dates ,themes, and allergy details in one go.

- Contact Page

The necessary contact details of the baker.

5. Design and User Experience

- Color Scheme:

- Rose brown for some headings,
- Soft Pink for the highlights
- Seashell for the background

- Typography

- Playfair display for big headings
- Cambria for easy-to-read body text

- Layout

A simple mobile-first design that also looks pleasant on a laptop.

- User-experience considerations

- Easy navigation at the top and big buttons, so the site is simple for everyone to utilize.
- Fonts will be modern and easy to read, making sure the photos of the cakes remain the main focus.

6. Technical Requirements

- Hosting and Domain:
 - A .co.za domain name hosted on a local South African server for fast loading.
- Languages
 - HTML for the layout
 - CSS for the colors and responsive design

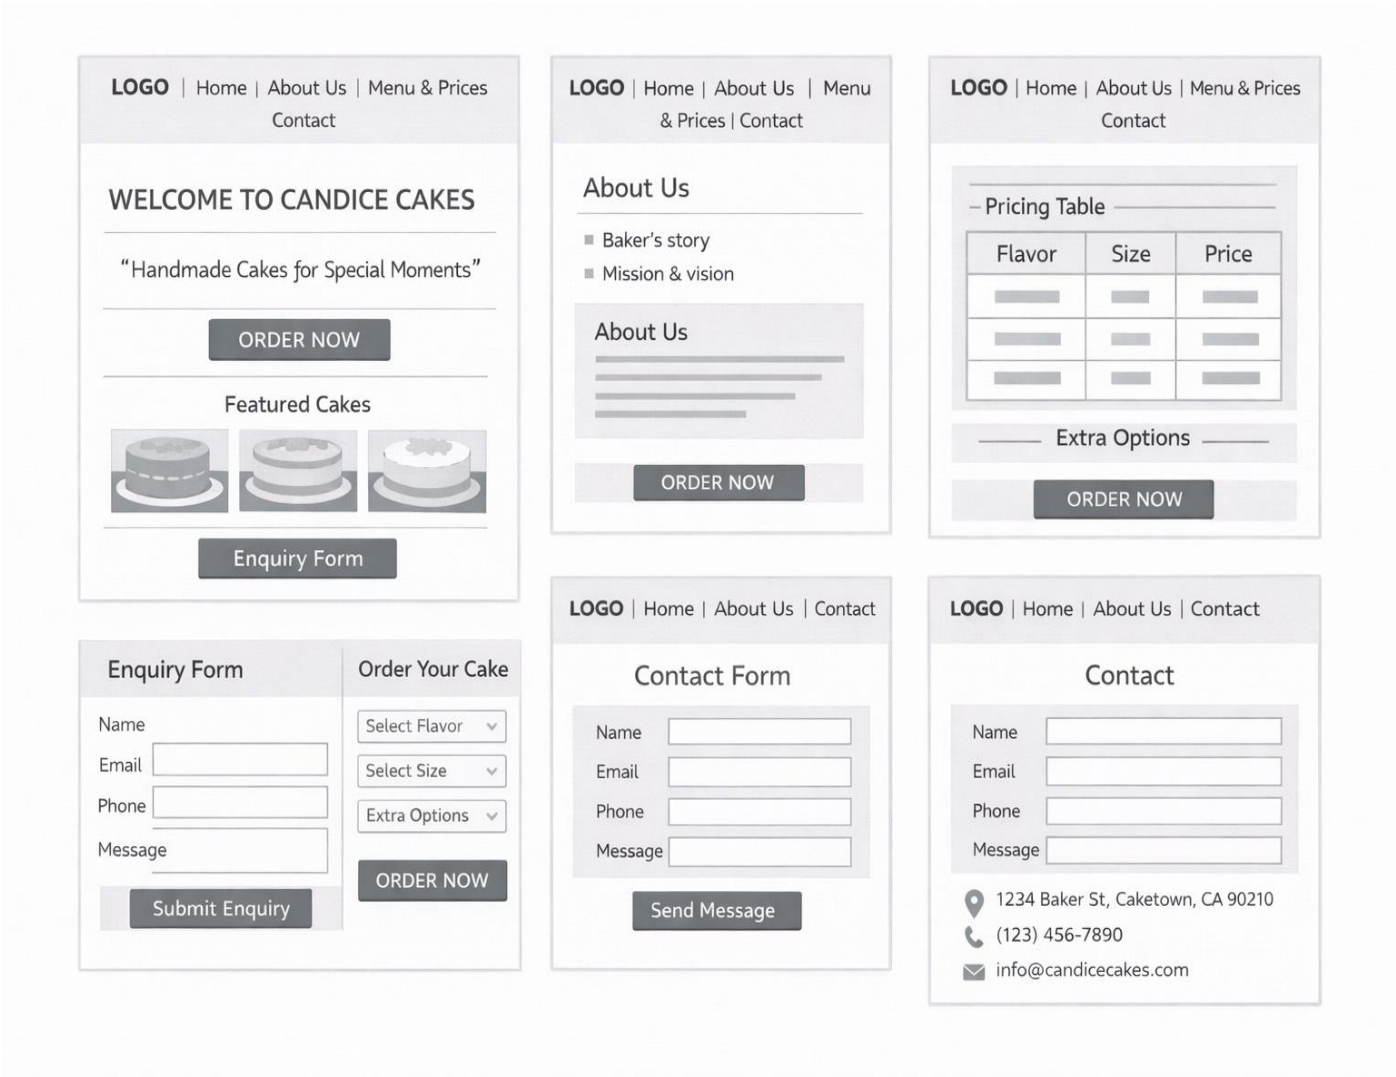

7. Timeline and Milestones

- Milestone 1: Submit the project proposal from the lecturer.
- Milestone 2: Gather high-quality photos of the baker's previous cakes.
- Milestone 3: Code the HTML and CSS for all five pages of the website.
- Milestone 4: Test the Website on a mobile phone to ensure that everything works correctly.
- Milestone 5: Hand in the final project and required documentation.

8. Budget

- Development: R5000-R10 000
- Domain: (TRUEHOST, 2026)
 - For .co.za it is approximately R90-R150 per year.
- Maintenance: R0 (Handled by the developer)
- TOTAL COST= Approximately R250 is required to get the website online.
